Caunton Engineering is one of the UK's leading steelwork contractors, offering CE Marked Structural Steelwork and a one stop construction solution. Specialising in the design, 3D Tekla BIM modelling, fabrication, surface treatment and erection of structural steelwork. Caunton Engineering can give a first class service every step of the way.

We are a family owned company, established in 1969 and have proven to be a progressive pioneer of fully automated manufacture, information technology and innovation. Following the successful integration of Secondary Steelwork packages to the Company's portfolio, we have invested in a new Secondary Steel Fabrication Workshop, which offers the same quality service and reliability to all our customers.

We can offer this as part of the main structural steelwork project or a small works package .

CE Marking & Welding Accreditations

The construction industry is facing one of the most significant changes for a decade as CE Marking of construction products becomes mandatory from the 1st July 2014 for fabricated structural steelwork, including secondary steelwork.

There is no need to wait until 1st July 2014 because Caunton are able to provide a CE Marked structural steel products to EN1090-2 EXC 4 now, including constituent products such as structural fasteners and cold rolled and are well ahead of the game for CE Marked Structural Steelwork.

Caunton Engineering, are certified to EN1090-2 EXC 4 for CE Marking and ISO 3834-2 Welding Quality Management System and can assure our customers that their insurances, bonds and warranties will not be invalidated.

You must comply with the Construction Products Regulation to ensure that you are not breaking the law. Failure to do so invalidates insurances, bonds and warranties.

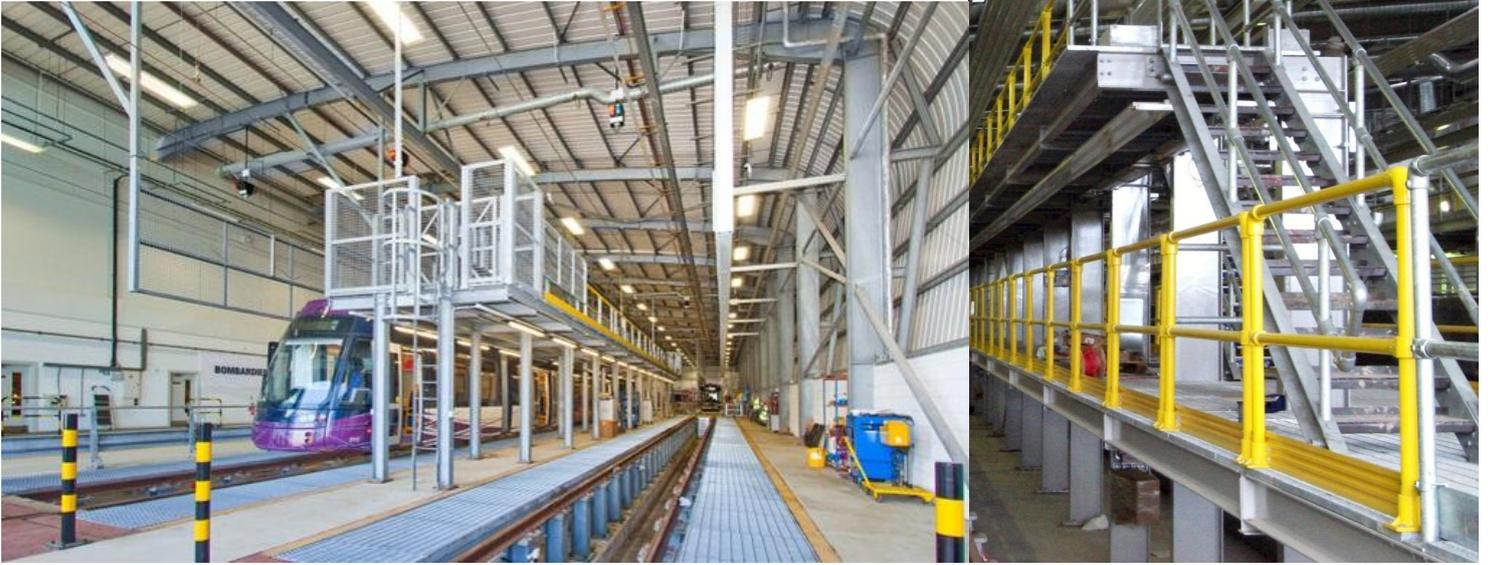

Staircases and Hand Rails

Steel Staircase Structures, with a range of tread options and handrail options. Fabricated "piece large" for speed of installation, or "piece small" for those restricted sites.

Access Walkways and Gantries

Works include access stairs, ladders, flooring, hand railing, both in conjunction with new frame buildings or within an existing building.

Cat Ladders

Cat Ladders, ship ladders and companion stairs, in a range of finishes, supply only, or supply and install.

Platforms & Plant Support Structures

We have the experience to co-ordinate with other trades in a 3D BIM environment to ensure that there are no clashes within the frame, such as pipe and penetration clashes. We also have the facility to trial erect structures prior to delivery / shipping overseas to ensure that the structures comply with the clients requirements.

Bespoke Steelwork

Export

We also have substantial experience and excellent facilities for exporting secondary steelwork
