Steel Tonnage

1,175 tonnes

Caunton Engineering worked on the new build and refurbishment of the Vancouver Shopping Centre in Kings Lynn. This was situated within the sensitive and historic environment of this famous city.

The client, Caddick Developments, together with their architects Comprehensive Design, had the brief to update the 60's shopping centre. Caunton supplied over 1,175 tonnes of steelwork for this project. White Young Green Partnership designed the framing for the shop, which contractor Alfred McAlpine Capital Projects constructed. Caunton's own directly employed erection team were aware of the sensitivity working so close to a live shopping environment where attention to safety was paramount.
