Steelwork Design

Caunton Engineering

The EMDC is a 200 acre redevelopment site on the former Castle Donington Power Station, located adjacent to junction 24 of the M1, at Castle Donington. The structure of the Plot 4 building is a 340,000sq.ft triple span portal frame with an internal office and hub. This major site was developed by Clowes Developments, with the architects being Leicester based IMA Architects.
