Steel Tonnage

500 tonnes

Caunton Engineering completed the structural steelwork for a new Learning Resources Centre for Middlesex University in Hendon. The sophisticated design was by architect BPR Architects and engineer Bridges Pound focussed on modern sustainability techniques and featured tubular steel columns coated with intumescent paint off site.

Caunton's own directly employed erection team were to maintain extra vigilance when handling the fire protected members. They also erected the pre-cast floors and staircases. The project incorporated 500 tonnes of structural steelwork.

Volker Fitzpatrick were main contractors on this most important and high profile improvement to facilities within the education sector.
