

Snow Hill 2 Building, Birmingham City Centre

Contractor

Balfour Beatty Construction

Engineer

Curtins Consulting
Engineers

Architect

Weedon Partnership
Architects

Steel Tonnage

2000 te

The development, comprising 43,000 square metres of office space, is known as Snow Hill 2 and is the sister building – and a taller sister too at 17 storeys – to the 15 storey office block Snow Hill 1 completed a few years ago.

Caunton supplied over 2000te of structural steelwork together with metal decking and shear studs. The building has three concrete service cores already constructed which provide overall stability. Connection is via cast-in plates.

The building, which is in the heart of the Birmingham commercial district, is located conveniently alongside the historic Snow Hill railway station, which is now the terminus for the successful and popular Chiltern Railways service from London Marylebone.
