

Hazlewood Foods – Manton Wood, Worksop

.....
Contractor

Clegg Food Projects

Caunton erected the steelwork for a new food processing factor for Hazlewood Foods at Worksop. The plant's main function was planned to be as a sandwich making facility.

Architect

Building Design Group

The erection progress was accelerated by the use of Caunton's mobile platforms – as pictured – with nearly 400 tonnes erected in just 2 weeks. These mobile platforms were each fitted with an on-board generator, arguably a UK first, which powered impact wrenches to accelerate bolt tightening.
