Steel Tonnage

800 tonnes

Caunton supplied the structural framework for Leicester Grammar School. Early in 2007, the Leicester Grammar School Trustees announced that they has completed an agreement with Land Securities Trillium for the construction funding and long term investment of the relocation of Leicester Grammar School and Leicester Grammar Junior School to Mount Farm, Great Glen.

Main contractor Norwest Holst is no stranger to successful PFI Schools Projects locally and is responsible for this prestige development. The facility accommodated the main school as well as the junior school and has incorporated first class academic and sporting facilities on one site.

Caunton supplied 800 tonnes of steelwork, along with the floor decking, thru deck studding and staircases, which were located in three main areas – a two storey academic block, a two storey pavilion and sports complex with swimming pool and a two storey aerobics area.

Caunton were pleased to have played a significant role in such an imaginative programme aimed at improving the education infrastructure of Leicester.
