Caunton Engineering
.....

Indurent Park is a 67-acre business park, developed on one of the largest regeneration sites in Derby, delivering modern commercial and industrial facilities.

.....
Architect
Stephen George and Partners
.....

Caunton's scope included the structural framing to the split-level multi-storey car park, comprising six half-storey parking decks connected by short ramps, together with the design and construction of a 43,078 sq ft portal framed unit. The industrial unit is formed in a twin-span portal frame, with each span measuring 26 metres.

.....
Engineer
Rodgers Leask Limited
.....

A total of 625 tonnes of structural steelwork was designed, supplied, and erected by Caunton Engineering. The project team included architect Stephen George and Partners and structural engineer Rodgers Leask Ltd.
