**Steel Tonnage**

1,100 tonnes

Caunton Engineering were awarded the contract, by main contractor Winvic Construction, for the structural steelwork for four units at St. Modwen Park, Derby.

This park is a 50 acre, high profile industrial and logistics park which was developed by St. Modwen, in partnership with Network Rail. The site occupies a prime position immediately adjacent to Pride Park and Wyvern Retail Park, which provides high quality logistics and production space.

Phase one of the development featured four units of between 39,000sq.ft and 131,000sq.ft, which were all framed by Caunton. Caunton designed, supplied and erected 1,100 tonnes of steelwork for the four warehouses.
